

Sri Sukhmani Institute of Engineering & Technology

Admission Notice for BCA / MCA

There are plenty of reasons to study BCA. There is an utmost need of skilled professionals to serve and solve the various problems in the world of technology and IT in India. Most of the students prefer to study this course because of the following advantages: It opens a pool of job opportunities in various fields, especially in the IT sector. BCA is almost equivalent to the BTech course. The major benefit of opting for BCA is that it is a 3-year program whereas BTech is a 4-year course. A handful of colleges offer BCA specialization as well as in the field of Data Science, Data Analytics, and Computer Science. There is an opportunity for students to go for higher studies too like MCA, to add an extra edge and update their skills & experience, which leads to career development. Students become proficient in well-used programming languages such as JAVA, C++, Python, CSS, Linux, etc., and enhance your technical skills as well. A candidate with a BCA degree is in huge demand since manpower is continuing to get replaced by the systems and the need for good skillful experts and professionals is there to operate and function. In terms of salary, BCA graduates can earn from INR 2.4-5 LPA in the starting and after getting industry experience and become proficient in advance technical skills, the salary hike can be around 30-40% and you can earn around INR 3.5-8 LPA after 2-4 years of experience.
